

Path 2 Integrity

ROTATORY ROLE-PLAYING AND ROLE-MODELS TO ENHANCE A RESEARCH INTEGRITY CULTURE

BACKGROUND

With the European research landscape rapidly changing, it is becoming increasingly essential to emphasise research integrity and to start handling new scientific techniques in a clear and accessible way.

Research integrity is an integral part of innovation, growth, and high-quality jobs. It results in more efficient, appropriate, useful, and reliable scientific evidence for policy-makers and entrepreneurs, where decisions based on research results can lead to a better future.

AIMS

Path2Integrity will support formal and informal learning methods and will contribute to establishing a culture of research integrity by:

- Establishing excellent learning paths with research integrity role-models and rotatory role-playing by developing and disseminating a Path2Integrity handbook of instruction;
- Raising awareness of scientific facts about research integrity and role-models in educational organisations through a widespread Path2Integrity campaign;
- Achieving wide-spread implementation of excellent learning paths, by using existing and successful educational practices as a foundation and international collaborations across four continents, along with robust assessment methods;
- Creating units for learning research integrity that address everyone either directly or indirectly involved in research, including secondary school students, undergraduates, graduates, and young researchers.
